Sales Engineer
Location: Dubai
Salary: AED 8,000 – 12,000

Industry: Filtration / HVAC / Gas Turbine Equipment

Job Brief:

We are looking for a dynamic and results-driven **Sales Engineer** with a Mechanical Engineering background to join our team in Dubai. The role involves driving direct sales, managing customer accounts, and building long-term client relationships. The Sales Engineer will be responsible for generating new opportunities, developing value propositions, coordinating with design consultants, and ensuring business growth while maintaining strong margins.

Job Responsibilities:

- Achieve assigned sales targets (bookings and billings).
- Prospect and generate new customer accounts while maintaining relationships with existing clients.
- Work closely with design consultants to support specification activities.
- Arrange and attend client meetings regularly, presenting solutions and company offerings.
- Monitor and report market trends, competitor activities, and business pipeline projections.
- Maintain a healthy and credible pipeline to support expected business growth.
- Provide techno-commercial assistance and proposals to prospects and customers.
- Collaborate with internal teams to ensure accurate and timely proposals.
- Ensure timely collection of payments from customers.
- Manage a healthy product sales mix while maintaining profitability.

- Convert competitor accounts into company accounts.
- Register, track, and update leads and opportunities in CRM/Zoho.
- Submit required sales inputs, reports, and projections in the prescribed format on time.
- Maintain strong business relationships with partners, clients, and key accounts.
- Undertake any additional responsibilities assigned by the reporting manager to support business needs.

Product List:

- HVAC Air Filters
- Gas Turbine Filters
- AHU (Air Handling Unit) Filtration Systems
- FCU (Fan Coil Unit) Filtration Systems
- Dust Collection Units
- Cleanroom & Containment Filtration
- Gas-Phase Filtration
- Air Pollution Control Equipment
- Industrial & Energy Filtration Solutions

Job Requirements:

- Sales experience in **HVAC equipment**, **air filtration systems**, or **related mechanical systems**.
- Backgrounds in companies selling or manufacturing **AHUs (Air Handling Units)**, **FCUs (Fan Coil Units)**, **filters**, **ducting systems**, or **ventilation equipment**.
- Candidates with exposure to **industrial filtration**, **dust collection**, or **gas turbine air intake systems** are a plus.
- Has interacted with **consultants, MEP contractors, and facility management firms**.
- Experience in **project-based sales** or **specification sales** (getting products approved at the consultant/tender stage).

- Degree: **Mechanical Engineering** degree (preferred).
- Proven record of achieving sales targets, growing accounts, and maintaining margins.
- Understands **technical selling**, not just trading or retail sales.

Preferred Knowledge:

- Technical and operational understanding of **gas turbine and engine filtration systems**.
- General knowledge of GT, compressor, and engine filtration systems.
- Sound knowledge of costing and pricing principles for products and services.
