Sales Manager
Location: UAE / Oman
Salary: Based on experience

Industry: Air / Gas Filtration

Job Brief:

Our client is seeking a Sales Manager - Filtration in Dubai to drive business growth across the UAE, Oman, and Yemen. The role focuses on expanding the Machinery Filtration and Acoustic Systems (MFAS) business by strengthening relationships within the existing installed base while acquiring new customers.

The ideal candidate will have strong experience in industrial sales, particularly in gas turbine filtration systems, and a proven ability to achieve double-digit annual growth. This position requires strategic territory management, CRM-driven sales tracking, and the ability to deliver profitable revenue through replacement filters, system upgrades, and site services.

Job Responsibilities:

- Maintain and grow business from the existing installed customer base while identifying opportunities to expand into new markets.
- Drive sales growth for Machinery Filtration and Acoustic Systems (MFAS) products and services within the UAE, Oman, and Yemen territories.

- Generate consistent and profitable sales revenues through replacement filters (ReMIF), system upgrades and repairs (ReFIT), and site services (SS).
- Build and strengthen relationships with existing clients to ensure their operational needs are supported with the most effective filtration and system solutions.
- Develop a well-documented regional machinery installed base and expand the opportunity funnel to support approximately 10% year-on-year territory growth.
- Conduct all sales activities in line with established sales policies, procedures, and company guidelines.
- Close REMIF and ReFIT opportunities within the designated territory through proactive customer engagement and solution-driven sales approaches.
- Prepare REMIF quotations through the CRM system in coordination with the inside sales support teams.
- Maintain and strengthen the existing customer base by ensuring that the company’s value proposition aligns with clients' business needs and operational requirements.
- Qualify all new requests for quotations according to company processes and guidelines.
- Develop and continuously maintain a prioritized target list for new business acquisition, including action plans and value propositions for the top 10 potential clients.
- Maintain and update the CRM system for the installed base within the designated territory in accordance with company policies.
- Ensure all opportunities are registered in the CRM system and properly tracked through the sales lifecycle.
- Clone and record all opportunities closed as won or lost within the CRM system to maintain accurate reporting.

- Update the gas turbine installed base list with details such as current installed filter type/manufacturer and last replacement dates.
- Prepare weekly and monthly order intake forecasts and contribute to the development and execution of annual territory business plans.
- Take full ownership of resolving client issues, questions, or clarifications to ensure a positive brand reputation and high levels of customer satisfaction.

Key Process Indicators (KPIs) Owned:

- Achieve territory order intake targets for MFAS REMIF business in line with the annual Order Book (OB).
- Achieve territory order intake targets for the MFAS ReFIT business in line with the annual Order Book (OB).
- Maintain territory as-sold margin for REMIF and ReFIT combined business in accordance with annual OB targets.
- Deliver year-on-year growth in the opportunity funnel value to support more than 10% annual sales growth.
- Ensure 100% maintenance and accuracy of the CRM database covering the installed base and prospective clients.

Job Requirements:

- Minimum of 5–7 years of experience in industrial sales, with a specific focus on **market expansion** and meeting or exceeding double-digit annual growth targets.
- Technical and operational understanding of gas turbine (GT) and engine filtration systems.
- General knowledge of gas turbine, compressor, and engine filtration systems.

- Sound understanding of product and service sales costing and pricing principles.
- Experience working with CRM and ERP systems for sales tracking, forecasting, and customer relationship management.
- Strong ability to develop and maintain client relationships while identifying new business opportunities.
- Excellent communication, negotiation, and relationship management skills.
- Strong analytical and problem-solving abilities.
- Ability to manage sales pipelines, forecasts, and territory business planning effectively.
- Ability to work independently while coordinating with internal teams such as inside sales and technical support.
