Senior Planning Engineer

Location: Abu Dhabi
Salary: Based on experience

Industry: Construction

Job Brief:

We are hiring for a Senior Planning Engineer job in Abu Dhabi to support our client's project planning and scheduling activities within the construction industry.

The ideal candidate will develop project schedules, monitor progress, analyze delays, and coordinate closely with project managers and site teams to ensure timely execution of large-scale civil projects. This role requires strong technical expertise in planning tools, deep knowledge of UAE construction standards, and the ability to manage complex project timelines effectively.

Job Responsibilities:

- Develop detailed **project schedules and work plans** for construction projects using industry-standard planning tools.
- Prepare and maintain **baseline schedules** and ensure proper monitoring throughout the project lifecycle.
- Track project progress and update schedules regularly to reflect actual progress and forecast completion timelines.
- Monitor project performance against the approved schedule and identify any delays or potential risks.

- Analyze project data and prepare **progress reports, dashboards, and planning documentation** for management review.
- Coordinate with project managers, engineers, and site teams to ensure alignment between planning activities and on-site execution.
- Provide recommendations to mitigate schedule delays and improve project efficiency.
- Participate in project meetings to review timelines, discuss progress updates, and address planning-related challenges.
- Support project teams in resource planning, work sequencing, and scheduling adjustments when required.
- Ensure all planning and scheduling activities comply with **UAE construction standards and regulations**.
- Monitor project milestones and ensure timely completion of deliverables.
- Maintain accurate records of project schedules, revisions, and progress updates.

Job Requirements:

- **Bachelor's degree in Civil Engineering** is required.
- **Minimum 10 years of experience in the UAE** within the construction industry.
- Strong experience in **project planning, scheduling, and progress monitoring**.
- Proficiency in planning tools such as **Primavera P6 and MS Project**.
- Demonstrated experience in handling **large-scale construction projects**.
- Good knowledge of **UAE construction standards and regulations**.

- Strong analytical and problem-solving skills with the ability to identify project risks and delays.
- Excellent coordination and communication skills to effectively work with project teams and stakeholders.
- Ability to manage multiple planning activities while ensuring accuracy and compliance with project requirements.
