TechstartersAfrica is hiring

So we're opening the call wider.
If you're a working professional in any of these areas, we want to talk to you:

→ Full Stack Software Developers
→ Frontend Developers
→ Backend Developers
→ Mobile App Developers
→ UI/UX Designers
→ Product Designers
→ QA/Test Analysts
→ Data Analysts
→ Technical Support Officers
→ Product/Project Support Talents
This isn't a "submit your CV into a black hole" post.

We have active roles, real companies, and a structure built to actually deploy you not just collect resumes.
